A fully automatic bread line also needs to be fed with dough

2020-11-16 08:30

Therefore GBT not only offers the bread line, but also the necessary technology in the system periphery. This ensures that the extraordinarily high performance of the 6.000 pieces of bread per hour corresponds with the high quality standards of GBT.
Here the automatic pre-portioner with a high dough capacity is, after a successful test run, packed securely for the trip to a long-standing customer in Russia.
The GBT team wishes them continued success.
