And again a GBT bread line is on its way to a customer in Russia

In the near future, 6.000 pieces of Batone bread, in the weight range of 350 - 450 g, will be produced on this fully automatic bread line. Batone bread is THE Russian bread par excellence. GBT had and has excellent relationships with the large bakeries in Russia for many years and has the relevant expertise in large-scale production systems.

Now, in good weather, the system is loaded onto 24 trucks and goes on the long journey. The assembly should then take place from the beginning of April. At the end of June, the Russian population will be supplied daily with 140,000 delicious Batone breads.
