More output, less energy consumption

2019-02-19 07:12

This industrial bread baking plant situated near Barcelona reaches an output of up to 5,000 pc. par-baked baguettes thanks to GBT‘s oven Mistral. Far beyond: The energy optimized modular conveyor oven saves up to 30 % of energy in comparison with a conventional cyclothermic oven. This is possible due to the specially developed use of the flue gases energy. Typically GBT: maximizing output, reducing energy consumption.
