We are pleased that the third of a total of four flatbread lines is going on its way after a successful final

acceptance.

The GBT team shows once again that our long-term customers can rely on our outstanding expertise and the highest quality standards. Even under the most difficult conditions, such as during a global pandemic, we meet our obligations and get the high-performance system on its way on time.

In the future, the plan is to operate four GBT systems 24/7, which each produce 16,000 flatbreads per hour, i.e. an incredible 64,000 pieces of flatbread per hour.

We, the GBT team, are always at our customers side and wish them continued success and above all good health.
